

Dr. Anton Mustonen

BIOGRAPHY

I graduated 2018 from University of Eastern Finland. I have been working in private since 2017. I have knowledge about all main digital scanners in Finland including Cerec Primescan, Planmeca Emerald, Trios 3Shape and iTero. I use digital workflow for prosthetics, orthodontics and implants. My enthusiasm is for esthetics and bite rehabilitation. I love to make people smile.

I have my own clinic, Hammasasema Aldente in Masku, where I have full inhouse equipment from Cerec ecosystem and iTero. Cerec Primescan is my day to day tool for quality treatment and one visit prosthodontic work. I do clinical work also in Hohde Turku. I am Clinical Advisor for GC and lecturer for both Invisalign and Cerec.

COURSE DESCRIPTION

- one visit crowns, Cerec Tessera
- crown design, milling, glazing
