

# Dr. Hanna Vallioniemi

## BIOGRAPHY

I graduated 2007 from Helsinki University and specialized into prosthodontics in Turku University. I have been using intra oral scanners for about ten years and nowadays use different scanners for various indications including implant prosthodontics, splints and orthodontics. I work at two private practices around Tampere region and at the department of maxillofacial surgery in Päijät-Häme central hospital.

## COURSE DESCRIPTION

- planning of treatment
- surgical and prosthetic phases
- digital workflows: impression taking, comparison to traditional impression taking, scanning the patient (tips & tricks)
- tips on how to get started with digital
