Resorptions: Etiology, Diagnosis and Clinical Management

Prof. Dr. Nancy Bletsa / Dr. Ole Iden

Luento- ja hands-on-tallenne – 206 min

Koulutussisältö: The lectures will cover the etiology, diagnosis, classification, and clinical management of resorptions with special consideration on the use of CBCT also. A review of clinical cases will highlight the importance of specialist collaboration for optimal results.

The “Hands-on” course will offer the opportunity to use different materials and instruments for managing resorptions on model teeth. Operating microscope will be used for the resorption management demo.
