

# Täydennyskoulutushakemus

- Webinaaritalenne – 122 min
- **Traumatic dental injuries - emergency treatment and follow-up, Assoc. Prof. Nancy Bletsa, Dr. Ole Iden & Prof. Leo Tjäderhane**
- **Koulutussisältö:** These two webinars and panel discussion were held on October 23rd, 2020. While most traumatic dental injuries occur in children and adolescents, people of all ages can be affected. Emergency treatment of dental trauma is something that all dentists must be prepared to perform. The type and severity of the injury will determine the necessary treatment. Selected trauma cases will be presented and challenges related to the interdisciplinary treatment will be discussed.
